

1. Identification of Substance and Company

Product Name:	Armor All Wheel Cleaner
Other Names:	None
HSNO Approval:	HSR002530 - Cleaning Products (Subsidiary Hazard) Group Standard 2006
Proper Shipping name	Not allocated
DG class	NA
UN Number:	NA
Packaging group:	Not Applicable
Hazchem Code:	1T (recommended)
Uses:	Wheel cleaner spray

Company Details

Company:	Spectrum Brands New Zealand Limited
Address:	Level one, 8 Hugo Johnson Drive, Penrose, 1061, Auckland, New Zealand
Telephone Number:	+64-9-571-7700
Emergency Telephone Number:	0800 764 766

2. Hazard Identification

Hazard Classifications

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO, Approval HSR002530 - Cleaning Products (Subsidiary Hazard) Group Standard 2006), and is classified as follows:

Classes 8.3A, 6.3A

Symbols:
DANGER

Degree of hazard:

Other classifications

There are no other Classifications that are known to apply.

Hazard and Precautionary Statements

Hazard Statements	Causes serious eye damage. Causes skin irritation.
Precautionary Statements	Keep out of reach of children. Read label before use. Wear protective gloves/eye protection/face protection. Wash hands thoroughly after handling. Wear protective gloves/protective clothing.
Further precautionary statements can be found in Section 4 – First Aid.	

3. Composition/Information on Ingredients

Component	CAS/ Identification	Conc (%)
Alkaline silicate salts	Proprietary	3-6%
Detergents	Proprietary	<10%
Other non hazardous ingredients	Proprietary	3-6%
Water	7732-18-5	to 100%

This is a commercial product whose exact ratio of components may vary. Trace quantities of impurities are also likely.

4. First Aid	
<i>General Information</i>	
You should call the National Poisons Centre if you feel that you may have been harmed or irritated by this product. The number is 0800 764 766 (0800 POISON) (24 hr emergency service).	
Recommended first aid facilities	Ready access to running water is required. Accessible eyewash is recommended.
<i>Exposure</i>	
Swallowed	Give a glass of water to drink. If effects occur, contact the National Poisons Centre or a Doctor.
Eye contact	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Apply continuous irrigation with water for at least 15 minutes holding eyelids apart. Immediately call a POISON CENTER or doctor.
Skin contact	IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: get medical advice/attention. Take off contaminated clothing and wash before re-use.
Inhaled	No first aid measures normally required. However, if vapours or mists have been inhaled, and irritation has developed, remove to fresh air and observe until recovered. If irritation becomes painful or persists more than about 30 minutes, seek medical advice.
<i>Advice to Doctor</i>	
Treat symptomatically.	
5. Firefighting Measures	
Fire and explosion hazards	There are no specific risks for fire/explosion for this chemical. It is non-flammable.
Suitable Extinguishing Substances	Carbon dioxide, extinguishing powder, foam, fog sprays, water jets.
Unsuitable extinguishing substances	Unknown.
Protective Equipment	Self-contained breathing apparatus. Safety boots, non-flammable overalls, gloves, hat and eye protection.
Danger caused by material, its combustion products or gases produced	Only small amounts of decomposition products are expected from this products at temperatures normally achieved in fires. This will only occur after heating to dryness. Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Nitrogen and its compounds, and under some circumstances, oxides of nitrogen. Occasionally hydrogen cyanide gas. Water.
Hazchem Code	1[T]
6. Accidental Release Measures	
Containment	If greater than 1000L is stored, secondary containment and emergency plans to manage any potential spills must be in place.
Emergency procedures	In the event of spillage alert the fire brigade to location and give brief description of hazard. Shut off all possible sources of ignition. Wear protective equipment to prevent skin, eye and respiratory exposure. Clear area of any unprotected personnel. Contain using sand, earth or vermiculite. Do not use sawdust on concentrate. Prevent by whatever means possible any spillage from entering drains, sewers, or water courses. (If this occurs contact your regional council immediately).
Clean-up method	This product is not considered flammable or ecotoxic. Small spills do not require any special clean up method. Larger spills should be mopped up and collected.
Disposal	Mop up and collect recoverable material into labelled containers for recycling or salvage. Recycle containers wherever possible. This material may be suitable for approved landfill. Dispose of only in accord with all regulations.
Precautions	Wear protective equipment to prevent skin and eye contamination and the inhalation of vapours. Work up wind or increase ventilation.
7. Handling and Storage	
Storage	Avoid storage of harmful substances with food. Store out of reach of children. Containers should be kept closed in order to minimise contamination. Keep from extreme heat and open flames. Avoid contact with incompatible substances as listed in Section 10.
Handling	Keep exposure to a minimum, and minimise the quantities kept in work areas. See section 8 with regard to personal protective equipment requirements. Avoid skin and eye contact and inhalation of vapour, mist or aerosols.

8. Exposure Controls/Personal Protection Equipment

Workplace Exposure Standards

A workplace exposure standard (WES) has not been established by WorkSafe NZ for this product. There is a general limit of 10mg/m³ for dusts and mists when limits have not otherwise been established.

NZ Workplace Exposure Standards (OSH, 2016).	Ingredient	WES- TWA	WES- STEL
	No ingredients are listed		

Engineering Controls

In industrial situations, it is expected that employee exposure to hazardous substances will be controlled to a level as far below the WES as practicable by applying the hierarchy of control required by the Health and Safety at Work Act (2015) and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

Personal Protective Equipment

Eyes 	Protect eyes with goggles, safety glasses or full face mask. Avoid wearing contact lenses.
Skin 	Avoid repeated or prolonged skin contact. Wear overalls, rubber boots and impervious gloves, such as nitrile or rubber gloves. Remove protective clothing and wash exposed areas with soap and water prior to eating, drinking or smoking.
Respiratory	Respirator is not required under normal use. However, if the product is being used in dusty or confined conditions, use of a mask or respirator may be preferred.

9. Physical and Chemical Properties

Appearance	Slightly yellowish/cloudy viscous liquid.
Odour	Characteristic odour.
pH	12.5-13.5
Vapour Pressure	2.37 kPa at 20°C (water vapour pressure).
Boiling Point	~100°C
Volatile Materials	No data available.
Softening/Melting Point	~0°C
Solubility	Completely soluble in water.
Specific Gravity or Density	1.022 - 1.042 at 21°C
Flash Point	Not flammable.
Danger of Explosion	Not explosive.
Auto-Ignition Temperature	Not flammable.
Upper & Lower Flammable Limits	Not flammable.
Corrosiveness	Non corrosive.

10. Stability and Reactivity

Stability	This product is unlikely to react or decompose under normal storage conditions. This product will not undergo polymerisation reactions.
Conditions to be avoided	Containers should be kept closed in order to avoid contamination. Keep from extreme heat and open flames.
Incompatible materials	None known.
Hazardous decomposition products	Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Nitrogen, and under some circumstances, oxides of nitrogen. Water.
Hazardous reactions	Not applicable.

Not fl

11. Toxicological Information

<i>Summary</i>	
Limited data available on the mixture. This product is not considered toxic if swallowed, absorbed through the skin or inhaled. It is considered a skin and eye irritant. There are no long-term effects associated with exposure by any route.	
<i>Supporting Data</i>	
Acute:	
Oral	This mixture is not considered to be harmful if swallowed. Using LD ₅₀ 's for ingredients, the calculated LD ₅₀ (oral, rat) for the mixture is >5,000 mg/kg. Data considered includes: alkaline salts >5000 mg/kg, detergents 300-2000mg/kg.
Dermal	No evidence of dermal toxicity.
Inhaled	No evidence of inhalation toxicity.
Eye	The mixture is considered to be corrosive to the eye, because some of the ingredients present at >3% are considered eye corrosives (alkaline silicate salts)
Skin	The mixture is considered to be a skin irritant, because some of the ingredients present are considered skin irritants in more concentrated form.
Chronic:	
Sensitisation:	No evidence of sensitisation for the mixture or any of its components (>0.1%)
Mutagenicity:	No evidence of mutagenicity for the mixture or any of its components (>0.1%)
Carcinogenicity:	No evidence of carcinogenicity for the mixture.
Reproductive / Developmental:	No evidence of reproductive toxicity for the mixture or any of its components (>0.1%).
Systemic:	No evidence of developmental toxicity for the mixture or any of its components (>0.1%)
Aggravation of Existing Conditions:	None known.

12. Ecological Data

<i>Summary</i>	
This product is unlikely to be considered ecotoxic in water or to land-based animals.	
<i>Supporting Data</i>	
Aquatic Bioaccumulation	Limited data on the mixture. Not considered bioaccumulative (>80% water, no evidence for any ingredient)
Degradability	Considered rapidly degradable (>80% water, no evidence of persistence for any ingredient)
Soil	Not considered toxic in soil.
Terrestrial Vertebrate	Animal-based acute toxicity data indicates low toxicity for terrestrial vertebrates. See acute toxicity.
Terrestrial Invertebrate	No evidence of terrestrial invertebrate toxicity for the mixture or any of its components (>0.1%)
Biocidal	The product is not designed as a biocide.

13. Disposal Considerations

Restrictions	There are no product-specific restrictions, however, local council and resource consent conditions may apply, including requirements of trade waste consents.
Disposal method	Dispose of residue and solutions that cannot be reused to sewer. If this is not possible dilute with water (at least 5 times as much water) and drain.
Contaminated Packaging	Rinse containers with water before disposal. Preferably re-cycle container, otherwise send to landfill or similar.

14. Transport Information

There are no specific restrictions for this product (not a dangerous good).

UN Number	NA	Proper Shipping Name	NA
Class(es)	NA	Packing group	NA
Precautions	NA	HAZCHEM code	1T (recommended)

15. Regulatory Information

This product has been approved under the Hazardous Substances and New Organisms Act HSR002530 Cleaning Products (Subsidiary Hazard) Group Standard 2006.

Specific Workplace Controls (as per HSNO approval referenced to Controls Matrix)

Key workplace requirements are:	
SDS	To be available within 10 minutes in workplaces storing any quantity.
Labelling	No removal of labels and/or decanting of product into other containers can occur.
Emergency plan	Required if > 10000L is stored.
Approved handler	Not required.
Tracking	Not required.
Bunding & secondary containment	Required if > 10000L is stored.
Signage	Required if > 1000L is stored.
Location Test certificate	Not required.
Flammable zone	Not required.
Fire extinguisher	Not required.
Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a location will depend on the classification and total quantities of other substances present in that location.	

Other Legislation

In New Zealand, the use of this product may come under the Resource Management Act and Regulations, the Health and Safety at Work Act 2015 and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016, local Council Rules and Regional Council Plans.

16. Other Information

Abbreviations

Approval Code	Approval HSR002530 Cleaning Products (Subsidiary Hazard) Group Standard 2006.Controls, EPA. www.epa.govt.nz
CAS Number	Unique Chemical Abstracts Service Registry Number
Ceiling	Ceiling Exposure Value: The maximum airborne concentration of a biological or chemical agent to which a worker may be exposed at any time.
Controls Matrix	List of default controls linking regulation numbers to Matrix code (e.g. T1, I16).
EC₅₀	Ecotoxic Concentration 50% – concentration in water which is fatal to 50% of a test population (e.g. daphnia, fish species)
EPA	Environmental Protection Authority (New Zealand)
HAZCHEM Code	Emergency action code of numbers and letters that provide information to emergency services, especially fire fighters
HSNO	Hazardous Substances and New Organisms (Act and Regulations)
IARC	International Agency for Research on Cancer
LEL	Lower Explosive Limit
LD₅₀	Lethal Dose 50% – dose which is fatal to 50% of a test population (usually rats).
LC₅₀	Lethal Concentration 50% – concentration in air which is fatal to 50% of a test population (usually rats)
MSDS/SDS	Material Safety Data Sheet (or Safety Data Sheet)
PES	Prescribed Exposure Standard means a WES or a biological exposure standard that is prescribed in a regulation, a safe work instrument or an approval under HSNO (including group standards).
STEL	Short Term Exposure Limit - The maximum airborne concentration of a chemical or biological agent to which a worker may be exposed in any 15 minute period, provided the TWA is not exceeded
TWA	Time Weighted Average – generally referred to WES averaged over typical work day (usually 8 hours)
UEL	Upper Explosive Limit
UN Number	United Nations Number
WES	Workplace Exposure Standard - The airborne concentration of a biological or chemical agent to which a worker may be exposed during work hours (usually 8 hours, 5 days a week). The WES relates to exposure that has been measured by personal monitoring using procedures that gather air samples in the worker's breathing zone.
