5. Firefighting Measures

Fire and explosion hazards	This is a combustible liquid. This product has the potential to cause fire or to create an additional hazard during a fire.
Suitable Extinguishing Substances	Carbon dioxide, extinguishing powder, foam, fog sprays, water jets.
Unsuitable extinguishing substances	None known.
Protective Equipment	Self-contained breathing apparatus. Safety boots, non-flammable overalls, gloves, hat and eye protection.
Danger caused by material, its combustion products or gases produced	Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Water. May form toxic mixtures in air and may accumulate in sumps, pits and other low-lying spaces, forming potentially explosive mixtures.
Hazchem Code	1T (recommended, no HAZCHEM signage necessary)

6. Accidental Release Measures

Containment	If greater than 1000L is stored, secondary containment is required. Emergency plans to manage any potential spills must be in place. Prevent spillage from spreading or entering soil, waterways or drains.
Emergency procedures	The container size generally will prevent major spills. If a major spill (e.g. >100L) occurs: Stop leak if safe/necessary; Isolate area (ensure no persons inside spill area). Shut off all possible sources of ignition. Collect spill – see below; Transfer to container for disposal Dispose of according to guidelines below (Section 13)
Clean-up method	Use absorbent (soil, sand or other inert material). Rags are not recommended for the clean-up of spills, as they may create fire or environmental hazard. Collect and seal in properly labelled containers or drums for disposal. If contamination of crops, sewers or waterways has occurred advise local emergency services.
Disposal	Mop up and collect recoverable material into labelled containers for recycling or salvage. Recycle containers wherever possible. This material may be suitable for approved landfill. Dispose of only in accord with all regulations.
Precautions	Wear protective footwear, overalls, gloves and safety glasses to clean-up large spills. Can be slippery on floors, especially when wet.

7. Handling and Storage

Storage	Avoid storage of harmful substances with food. Store out of reach of children. Containers should be kept closed in order to minimise contamination. Keep from extreme heat and open flames. Avoid contact with incompatible substances as listed in Section 10.
Handling	Keep exposure to a minimum, and minimise the quantities kept in work areas. See section 8 with regard to personal protective equipment requirements.

8. Exposure Controls/Personal Protection Equipment

Workplace Exposure Standards
A workplace exposure standard (WES) has not been established by WorkSafe NZ for this product. There is a general limit of 10mg/m³ for dusts and mists when limits have not otherwise been established.

NZ Workplace Exposure Standards (2016).	Ingredient	WES- TWA	WES- STEL
	No Ingredient listed	No data	No data

Engineering Controls
In industrial situations, it is expected that employee exposure to hazardous substances will be controlled to a level as far below the WES as practicable by applying the hierarchy of control required by the Health and Safety at Work Act (2015) and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

<i>Personal Protective Equipment</i>	
Eyes 	Product is irritating to eyes – glasses are not required for normal use - use eye protection when using this product in bulk.
Skin 	If discomfort is felt (e.g., if pre-existing conditions exist, such as dermatitis, cuts or sensitive skin), gloves may be helpful. If you suffer from dermatitis type skin conditions, use gloves, e.g nitrile gloves.
Respiratory	A respirator when airborne concentrations approach the WES (section 8). If using a respirator with an organic vapour cartridge. Ensure that the cartridges are correct for the potential air contamination and are in good working order.
